

Developer C++ [Automotive]

Apply Now

Company: Abylsen

Location: Barcelona

Category: computer-and-mathematical

¿What would you be doing in your day a day?

Adapt the toolchain to meet new project requirements.

Maintain and optimize software tools.

Support algorithm developers, embedded engineers, and validation engineers by tailoring the toolchain to their needs.

Define and develop software tools for video and CAN data recording and/or injection.

¿What do we need from you?

Academic Background: Degree in Computer Science, Telecommunications, or similar field.

Experience: Minimum **5 years** of relevant experience.

Proficiency in C++.

Familiarity with inter-process communications using QT Signal-Slot, events, or Inter-Process Communication (IPC), publisher-subscriber paradigm.

Experience in communication with camera drivers via I2C.

Understanding of Communication Protocols such as CAN or similar, with header + payload.

Proficiency in CMake configuration and compilation.

Ability to compile in Windows and Ubuntu environments.

Experience with CI/CD using Jenkins.

Good level of English.

And, last but not least, what do we offer?

Permanent contract with Abylsen as our consultant.

Salary range open to the candidate's experience.

Ticket restaurant.

Private health insurance + daily gas contribution.

Hybrid position.
