Graphics AI Software Engineer

Apply Now

Company: Plain Concepts

Location: Spain

Category: computer-and-mathematical

We are expanding our development teams. Although we don't care much about titles, we call this role **Graphics AI Software Engineer.** Do you like working with cutting-edge technologies? Is technology your passion? If you have experience in virtual and augmented reality graphics applications, and you want to apply **Artificial Intelligence** in real **3D projects** , this is your team.

You will work on multiple research projects in collaboration with the team and with applied engineering teams. Our vision is to build a multidisciplinary team that directly manages projects in an AGILE way to find and implement the best solutions

What will you do?

You will develop 3D graphics applications for PC, Web, VR, and AR using our own graphics engine: Evergine.

Develop/integrate Artificial intelligent techniques into our projects to build more powerful 3D applications.

You will participate in architectural design and decision-making in a collaborative and constructive environment.

You will be able to use/apply the latest state-of-the-art algorithms/models related to computer vision and 3D such as SAM, GroundingDINO, and NERF.

Requirements

Expertise in C# and .NET.

Experience working with 3D projects.

3D mathematics (Vectors, Matrices, Quaternions, coordinate systems).

Knowledge of 3D engines such as Unity or Unreal.

Interested in and thoughtful about the impacts of AI technology.

Ability to think critically.

Good interaction and ability to work with the different teams in the offices globally.

Passion for technology.

Constant desire to learn.

Additional knowledge in:

Expertise with deep learning frameworks like Pytorch or Tensorflow/Keras.

Experience building systems based on machine learning (especially deep learning) methods.

Expertise in optimizing and deploying AI algorithms for large-scale applications.

Familiarity with cloud platforms (e.g., AWS, Azure, or GCP) and their AI/ML services.

Strong expertise in Python.

Comfort with rapid prototyping and disciplined software development processes.

Good level of English (international environment).

Benefits

Salary determined by the market and your experience

Flexible schedule 35 Hours / Week (no salary reduction)

Fully remote work (optional)

Flexible compensation (restaurant, transport, and childcare)

Medical and dental insurance (completely free of charge for the employee)

Individual budget for training and free Microsoft certifications

English lessons (1 hour/week)

Birthday day off

Monthly bonus for electricity and Internet expenses at home

Discount on gym plan and sports activities

Plain Camp (annual team-building event)

The pleasure of always working with the latest technological tools!

And you may wonder… Who is Plain Concepts?

Plain Concepts is made up of 400 people who are passionate about technology, driven by the change towards finding the best solutions for our customers and projects. Throughout the years, the company has grown thanks to the great technical potential we have and relying on our craziest and most innovative ideas. We currently have over 14 offices in 6 different countries. Our main goal is to keep growing as a team, developing the best and most advanced projects in the market. We truly believe in the importance of bringing together people from different backgrounds and countries to build the best team, with a diverse and inclusive culture.

What do we do at Plain Concepts?

We are characterized for having a 100% technical DNA. We develop customized projects from scratch, technical consultancy, training, and our own product: Sidra Data Platform

We don't do bodyshopping or outsourcing

Our teams are multidisciplinary, and the organizational structure is flat and horizontal

We are very committed to AGILE values

Sharing is caring: We help, support, and encourage each other to expand our knowledge internally and also towards the community (with conferences, events, talks…)

We always look for creativity and innovation, even when the idea might seem crazy to others

Transparency is key to any relationship

To know more about us, have a look in our website:

At Plain Concepts, we certainly seek to provide equal opportunities. We want diverse applicants regardless of race, colour, gender, religion, national origin, citizenship, disability, age, sexual orientation, or any other characteristic protected by law.
