Software Engineer (Java)

Apply Now

Company: Amdocs

Location: Spain

Category: computer-and-mathematical

In one sentence

Responsible for design, development, modification, debug and/or maintenance of software systems

What will your job look like?

• Design, develop, modify, debug and maintain software code according to functional, non-functional and technical design specifications.

• Participate actively in daily, refinement, planning and retrospective meetings within the team.

• Use of good practices and key patterns, assuring technical compliance with technical lead and software architect guidelines as well as project needs.

• Collaborate and add value through participation in peer code reviews, provide comments and suggestions, and work with cross-functional teams to achieve goals.

• Support team members when required.

• Serve as the technical focal point with other teams to resolve issues related to interfacing functionalities.

All you need is...

Mandatory skills:

• at least 5-6 years' experience as a software engineer,

• very good interpersonal skills and focus on teamwork,

• ability to handle multiple competing priorities in a fast-paced environment,

• very good understanding of Java 17

• very good knowledge of Spring/Spring Boot framework is a must,

• good understanding of building rest APIs,

• messaging service experience using Kafka,

• very good experience with relational and non-relational database systems,

• solid knowledge using standard design and integration patterns, as well as development best practices,

• very good experience in working with systems based on microservices architecture,

• good experience with modern SDLC methodologies: QA and CI/CD pipelines, unit, component, contract, integration, contract, e2e, and performance testing automation in microservices environments

Nice-to-have skills:

• Grafana, Sonar,

• Spring Integration,

• Docker and Kubernetes experience. Good knowledge about containers and pods development cycle administration,

• OpenShift Container Platform

Why you will love this job:

• You will be challenged to design and develop new software applications.

• You will have the opportunity to work in a growing organization, with ever growing opportunities for personal growth.
