

## Software Engineer - Oracle NetSuite

[Apply Now](#)

Company: Oracle

Location: Spain

Category: computer-and-mathematical

Oracle's technology is changing the way the world does business, and we're looking for a Software Engineer to develop groundbreaking products in contextual targeting and brand safety. We practice agile software development, using the latest languages, frameworks, and toolsets to build the software and services that advance our industry.

### **What you will do**

Develop innovative solutions to our customers' problems. You'll build and debug novel software, make changes to existing software, and act as a senior member of a small, autonomous team.

Collaborate with team members to produce high-quality software

Review team members' work and offer constructive feedback

Support and mentor junior team members

Take an active role in team planning, review, and retrospective events

Work with team members to define systems architecture and approach

Deeply understand business logic and customers' goals, while working closely with product management and UX

Provide occasional on-call support

Career Level - IC3

**We also use...**

Java, Kotlin, Typescript, JS, React.

RESTful APIs and web services

SQL (Oracle databases)

IntelliJ IDEA, TeamCity

Jira, Confluence

GitLab

### **What we will offer you**

A competitive salary with exciting benefits

Flexible and remote working so you can do your best work

Learning and development opportunities to advance your career

An Employee Assistance Program to support your mental health

Employee resource groups that champion our diverse communities

Core benefits such as medical, life insurance, and access to retirement planning

An inclusive culture that celebrates what makes you unique
