

SQA Manager Spain

[Apply Now](#)

Company: Facil

Location: Spain

Category: arts-design-entertainment-sports-and-media

Job description

Close teamwork with suppliers for the development of the product quality and continuous improvement projects is one of your main tasks. You will set up and implement a plan to review product audit data at the suppliers for all fasteners.

As part of an international team, you will support the Facil quality engineers to develop and improve supplier quality assurance and the different quality coordinators with the investigation, follow up of major quality concerns and provide on-site support where needed.

You will work closely together with the purchasing department as you will inform all suppliers about the customer and Facil requirements. You are responsible to monitor supplier quality performance and define the supplier status. As a team you work out new programs and resourcing plans to review supplier sourcing.

You will report directly to the Quality & Operations Engineering Manager Europe.

Requirements

Master or minimum bachelors degree or equal by experience

At least 3 years of experience in the quality and audit environment in the automotive sector

Fastener product and production processes knowledge is required

Knowledge of relevant quality standards is needed

Meticulous and methodological

Analytical capacity and a critical mindset

Persistent and persuasive

Customer focused & good communication skills

Team player & ability to work independently

Flexible in working time and willing to travel on a frequent basis in Europe and worldwide if requested

Fluent knowledge of English is required. Other languages are a plus.

Offer

Is quality your middle name and do you like contacts with customer and suppliers?

Do you like to work with an international team? **Then this is the perfect job for you!**

Besides an international atmosphere with lots of growing opportunities, Facil offers a training program based upon your individual competences.
