

## System Engineer, Automotive

[Apply Now](#)

Company: Applus IDIADA

Location: Tarragona

Category: computer-and-mathematical

### Job Description

We are looking for a System Engineer, with automotive, naval or aerospace skills or knowledge. You will be member of the Architecture team of the Applus IDIADA Group, working from Head Quarter's office (Santa Oliva, Tarragona).

Your **mission** will be the cooperation with the rest of the SE team to establish new methodologies related to System Engineering for OEMs, some activities are defined below:

- Requirement definition from vehicle to component level.
- Functional and non-functional approach.
- Definition of vehicle breakdown structure.

Your main **responsibilities**(shared with the rest of the System Engineering team) will be to give support the following areas, guaranteeing de methodology and traceability:

- Inputs from stakeholders.
- Technical product definition (experts on the systems/functions).
- Test and validation.
- Component owners.
- Manufacturing.
- Quality.

Additional valued competences:

- Requirements management.
- Test case definition.

- Passionate in Automotive
- Knowledge of vehicle assembly

### Qualifications

#### Profile

- Knowledge of Application lifecycle management tools (Siemens Polarion, IBM DOORS, Vector PREEvision...).
- System engineering tools and processes are highly valuable (MBSE, Rhapsody, SysML, ASPIICE, AUTOSAR...).
- Good communication skills and confident in discussions at different hierarchical levels.
- Recognizable empathy, with team spirit, and with high level of assertiveness.
- Committed, goal driven, with successful result orientation and with strong service orientation.
- Open to work in a very international company with multicultural team.
- Knowledge of automotive sector as a must (commercial vehicles is highly valuable).

#### Education

- Engineer specialised in Industrials, Mechatronics, Electronics or Electronics.

#### Languages

- Fluent English
- Other languages will be asset.
